TEXTRON Systems

## Better, Faster, More Affordable Testing

AAI Test & Training's Automated Test Equipment (ATE) group delivers a wide variety of test systems and services designed to meet the specific requirements of aerospace and defense contractors. The team has delivered more than 4,000 custom test systems to companies worldwide, including Lockheed Martin, Boeing, BAE Systems, Raytheon and Honeywell.

# AEROSPACE AND DEFENSE TEST SOLUTIONS

AAI Test & Training's ATE group, located in Austin, Texas, provides test systems and test program sets for a broad range of aerospace and defense systems, subsystems, assemblies and components. The group's aerospace and defense test systems provide reliable and accurate testing for systems and components including:

- Missile
- Satellite
- Radar
- Electronic warfare
- Aircraft and avionics
- Communication
- Navigation
- Identification
- Mechanical
- Actuators
- Sensors
- Line replaceable units
- Shop replaceable units

In addition, customers receive comprehensive system documentation for their devices. This enables new test devices to be easily integrated into customers' quality processes and procedures.

The team's specialized ATE facility in Austin is ISO9001:2008 and AS9100 certified, and utilizes proven fabrication and quality processes to achieve performance and reliability.

As part of the larger Textron Systems family of businesses, AAI Test & Training understands the unique needs of defense and aerospace customers. The ATE group has an established government contractor infrastructure and the necessary compliance, security and export capabilities to make doing business seamless and efficient.

Accurate, reliable testing enables aerospace and defense customers to help their end users stay safe and mission ready. AAI Test & Training's ATE group provides equipment and services to assist customers in achieving peak performance from critical systems, subsystems, assemblies and components.
